

### Theme 3: Shale gas extraction

<b>Index No.</b>	<b>Paper No.</b>	<b>Paper Title</b>	<b>Authors</b>	<b>Affiliation</b>
44	025	Source program development for conceptual model of multi-stage fracturing process	X Cui and H Li	Dalian University of Technology, Australia
45	047	An investigation into the interactions between the kerogen and inorganic matrix during the shale gas depletion	P Cao, J Liu and Y Leong	The University of Western Australia, Australia
46	051	Evolution of Shale Apparent Permeability from Stress-Controlled to Displacement-Controlled Conditions	M Wei	China University of Mining and Technology, China
47	063	Modelling of Ultra-low permeability characteristics in shale reservoirs	H Liu and Ranjith PG	Aramco Research Centre-Houston, USA
48	078	Two and Three-Dimensional Numerical Analysis of Borehole Stability for Gas wells Piercing Longwall Working Faces	S Liang, D Elsworth, X Li and D Yang	China University of Mining and Technology, China
49	105	Evaluation of Stimulated Reservoir Volume Using the Fluorescence Method in Hydraulic Fracturing of Shale Cores	Z Bennour, S Watanabe, Y Chen, T Ishida and T Akai	Kyoto University, Japan
50	130	Experimental investigation on the effects of flow resistance on the fracturing fluids imbibition into Fractured Shale Using NMR monitoring method	L Yang and H Ge	China University of Petroleum, China
51	131	Experimental Investigation on the Imbibition Characteristics in Gas Shale: Marine and Continental Shale as Comparative Study	H Ge and L Yang	China University of Petroleum, China

### Theme 3: Shale gas extraction

52	132	A study of hydraulic fracture geometry concerning complex geologic condition in shales	T Zhou, S Zhang, H Ge, Y Zou, Ni Li and S Hao	China University of Petroleum, China
53	133	Quantitative characterization of microscopic pore structure in Niutitang shale, from the Sichuan Basin, South China	P Wang, Z Jiang and C Zhang	China University of Petroleum, China
54	134	Laboratory study of anisotropy in the mechanical properties of gas shales	Z Pan, H Qu and Y Peng	CSIRO, Australia
55	151	Tight reservoir of Lucaogou formation in Jimusar sag, Junggar basin	Y Zhang, Q Luo and J Wang	China University of Petroleum, China
56	161	Effect of clay swelling pressure on the mechanical properties of brittle shale	F Meng, H Ge, W Yan, S Wu and J Wang	China University of Petroleum, China
57	170	Main factors control the shale gas accumulation in the Yudongnan area, Southwest China	Z Li, Z Jiang and L Liu	State Key Laboratory of Petroleum Resources and Prospecting, Australia
58	171	Investigating the effects of initial water saturation and imbibing fluids on spontaneous imbibition of Barnett shale samples at different depths	Z Gao, Q Hu, Z Jiang, Z Li, W Yang and D Liu	China University of Petroleum, China
59	174	Characteristics and controlling factors of pores in 7th Member shale reservoirs in the south eastern Ordos Basin	W Yang, Z Jiang, Z Li, Z Gao and D Liu	China University of Petroleum, China
60	181	Experimental study on the anisotropy of shale with wave velocity and permeability	X Wang, H Ge, H Chen and J Wang	China University of Petroleum, China
61	204	An extended method for over core stress measurement based on a thermo-poro-elastic analysis: implementation	B Wu, X Zhang, RJeffrey and K Mills	CSIRO, Australia

### Theme 3: Shale gas extraction

62	207	Simulation of Hydraulic Fracturing with CO <sub>2</sub> Foam Using a Fracture Propagation Model Coupled with Geomechanics in a Shale Gas Reservoir from Cooper Basin, South Australia	Y Fei, M Gonzalez, K Pokalai, V Nguyen, S Sarkar and M Haghghi	The University of Adelaide, Australia
63	226	A fully-coupled simulation model of water spontaneous imbibition into clay-rich gas shale	H Qu, Y Peng, J Liu, Z Pan and F Zhou	China University of Petroleum (CUP), China
64	227	Quantitative assessment of methane sorption capacity on coal and shale under ternary influences of pressure, temperature and moisture content	D Chen, Z Ye, Z Pan and D Wang	China University of Petroleum (CUP), China
65	232	Can hydraulic fracturing with supercritical carbon dioxide enhance the permeability of unconventional shales?	W Wu	Stanford University, USA
66	244	Case study of the heterogeneity of Continental shale gas reservoir in Ordos, China using well logs of DPM	L Li, X Deng, R Ma, Y Tan and B Huang	Institute of Geology and Geophysics, Chinese Academy of Sciences, China
67	279	Molecular Simulation of Adsorption in Shale Kerogen Pore	R Xu	Tsinghua University, China
68	292	Vertical heterogeneity of shale gas reservoir in the Lower Silurian Long maxi Formation in North eastern Sichuan Basin, SW China	J Liu and YB Yao	School of Energy Resources, China University of Geosciences, Beijing, PR China
