

## Theme 4: CO<sub>2</sub> Sequestration

Index No.	Paper No.	Paper Title	Authors	Affiliation
69	010	Mechanical integrity of geopolymers under down-hole stress conditions: Application as well cement for CO <sub>2</sub> sequestration wells	M. Nasvi and Ranjith PG	Faculty of Engineering, University of Peradeniya, Sri Lanka
70	017	Experimental Study on SCCO <sub>2</sub> Permeability and Swelling in Coal Bed	W Liang	College of Mining Engineering, Taiyuan University of Technology, China
71	031	An insight into the swelling of coal induced by gas adsorption: an elastoplastic model with surface stress	Jili Feng, Chaojun Li and Lu Wan	China University of Mining and Technology, China
72	092	A macro scale overview on coal mass permeability alterations occur upon CO <sub>2</sub> injection into Australian low rank coal	AS Ranathunga, MSA Perera, Ranjith PG and GPD De Silva	Monash University, Australia
73	155	A micro-scale numerical study of fluid flow behaviour associated with super-critical CO <sub>2</sub> fracturing of shale fractured reservoirs	J Liu, Y Ju, J Wang, F Gao and Q Wu	China University of Mining and Technology, China
74	177	Experimental study on properties of CO <sub>2</sub> adsorption and swelling under different pressure and moisture in coal	Q Du, X Liu, E Wang and Z Cao	Tsinghua University, China
75	183	A comparative study of Shale gas development potential between Australia and the US	PNK De Silva	University College London, Australia
76	190	Carbon Sequestration Potential of Hot Dry Rock Enhanced Geothermal Systems	C Xu, P Dowd and Q Li	University of Adelaide, Australia

## Theme 4: CO<sub>2</sub> Sequestration

77	205	Numerical analysis of CO <sub>2</sub> injection into deep saline aquifers using unified pipe network method	F Ren, G Ma, Y Wang and T Li	The University of Western Australia, Australia
78	228	Evaluation of Non-Darcy effect on CO <sub>2</sub> sequestration in coal seams	Z Ye, D Chen, Z Pan, B Hou and X Zheng	China University of Petroleum (CUP), China
79	261	Economic and time sensitive issues surrounding CCS - A policy analysis	VVK Maddali, GA Tularam and P Glynn	CSIRO, Australia
80	262	Resolving fluid flow in fractured shale using breakthrough experiments	H Aljamaan, V Vishal and Ay Kovscek	IIT Bombay, India
81	266	Predictive analytics in geomaterial science: exploring the limits and promise of big microstructural data on fractured media	A Tordesillas	University of Melbourne, Australia
82	280	Experimental Investigation on the behaviour of Supercritical CO <sub>2</sub> during the Reservoir Depressurization	R Xu	Tsinghua University, China
83	291	Buoyancy driven flow, mixing and dissolution trapping of supercritical CO <sub>2</sub> in deep aquifer	M Singh and A Chaudhuri	Indian Institute of Technology Madras, Chennai, India
84	296	Experimental Study on SCCO <sub>2</sub> Permeability and Swelling in Coal Bed	W Liang, B Zhang, Z Li and Y Zhao	Taiyuan University of Technology, China
