

## Theme 1: Deep rock mechanics and mining theory

Index No.	Paper No.	Paper Title	Authors	Affiliation
1	1	Limit analysis on progressive collapse mechanism of tunnel roofs under steady flow condition	Jingjing Liu, Tielin Chen, Xiangfei Kong and Qun Zhang	Beijing Jiaotong University
2	2	Fatigue Properties of Granite Subject to Repetitive Compressive Impacts	Tao Zhou, Songlin Dong and Jianbo Zhu	Tianjin University
3	3	Modelling surface subsidence during underground coal gasification	Yury Derbin, James Walker and Dariusz Wanatowski	University of Nottingham
4	4	Experimental Study on Influencing Factors of Transmission Coefficient of Stress Wave Propagating through Jointed Rock Mass	Jin Huang, Xiaoli Liu, Enzhi Wang and Sijing Wang	Tsinghua University
5	24	Study on in-situ stress measurement theory in deep metal mines considering non-linear elastic stress-strain	Zhang Yihai, Qiao Lan and Li Yuan	University of Science and Technology Beijing
6	29	Time-Dependent Deformation Behavior of Unloading-Fractured Marble	Lu Wang, Jianfeng Liu, Jianliang Pei and Huining Xu	Sichuan University
7	39	A creep damage constitutive model for transversely isotropic rocks	Xiao Mingli, Zhuo Li, Xie Hongqiang, He Jiangda and Liu Huaizhong	Sichuan University
8	40	Correlation between fracture scale and frequency characteristic of engineering rock mass	Feng Dai, Bo Qian, Peng Jiang, Nuwen Xu, Jiawen Zhou and Biao Li	Sichuan University
9	42	Mechanical characteristics of dry and saturated sandstone under triaxial loading and unloading tests	Zhi Sun, Diyuan Li, Wenjian Wang and Xibing Li	Central South University
10	44	Simulating the mechanical behavior of transversely isotropic rock	Zhiyong Liu, Mingli Xiao, Jianfeng Xue, Lielie Li, Hongqiang Xie and Jiangda He	Sichuan University
11	46	Seepage characteristics of a fractal single fracture under the coupling of multiple experimental cases	Yuan Peng, Ru Zhang, Yang Ju, Mingzhong Gao,	Sichuan University

## Theme 1: Deep rock mechanics and mining theory

			Jing Xie, Yi Luo and Zetian Zhang	
12	47	Study on mechanical property and model of Jinping deep marble under uniaxial static-dynamic coupled load	Qiang Tan, Shiyong Wu, Heping Xie, Li Ren, Ru Zhang, Mingzhong Gao, Jianbo Zhu, Yuan Peng and Li Qin	Sichuan University
13	50	Rheological Constitutive Model of Marble and Intelligent Identification of Rheological Parameters for Diversion Tunnel in Jinping Hydropower Station II, China	Zhuo Li, Xiao Mingli, Xie Hongqiang and He Jiangda	Sichuan University
14	59	A calibration method of discrete element parameters on strength envelop of rocks	Huai-Zhong Liu, Jeen-Shang Lin, Ming-Li Xiao, Jiang-Da He, Hong-Qiang Xie and Li Zhuo	Sichuan University
15	62	Improved short and long time average ratio method with multi-scale theory for accurate arrival picking	Zilong Zhou and Ruishan Cheng	Central South University
16	63	Failure Style and Acoustic Emission Characteristics of Basalt under Fatigue Loading	Kai Si, Ruidong Peng, Zhendong Cui, Meixuan Ge and Zelong Xie	China University of Mining and Technology (Beijing)
17	66	Mechanical Behaviour and Acoustic Emission Characteristics of Rock Salt Under Three Point Bending Load	Jianliang Pei, Jianfeng Liu, Lu Wang and Chaofu Deng	Sichuan University
18	71	Development of coring system with in-situ condition for deep rock by Ultrasonic	Ling Chen, Xin Guo, Hao Wan, Xia Hua, Yiqiang Lu, Cong Li and Zhiqiang He	Sichuan University
19	76	Application of 3D Printing technology in geotechnical-physical modeling: Tentative experiment practice	Quan Jiang and Li-Fu Li	Institute of Rock and Soil Mechanics, Chinese Academy of Sciences
20	84	A simplified approach for permeability distribution around a coal roadway considering post-peak unloading and elastic compaction	Yi Xue	Xi'an University of Technology

## Theme 1: Deep rock mechanics and mining theory

21	91	Investigation of the mechanical behaviour of brine saturated coal under uni-axial compression	Suresh Madushan Sampath Kadinappuli Hewage, Samintha Perera, Ranjith Pathegama and Stephan Matthai	The University of Melbourne
22	92	Stress relief mining and design methods	He Wang, Xiaocong Yang, He Chen, Hui Cao, Xiushan Qin, Ye Yuan and Shibo Yu	Beijing General Research Institute of Mining and Metallurgy Technology Group
23	109	Dynamic empirical Mohr–Coulomb criterion of marble under low loading rate	Fengqiang Gong, Song Luo, Ge Lin and Xuefeng Si	Central South University
24	113	Effect of water content on the dynamic compressive strength of coal under confining pressure	Shengwei Li, Heping Xie and Mingzhong Gao	Sichuan University
25	119	Experimental investigate on damage evolution and crack propagation of multiple pillars under cyclic loading	Zilong Zhou, Haiquan Wang and Fu Liu	Central South University
26	136	Rock support interaction in tunnelling under high stress conditions	Sandeep Kumar Sahu and V B Maji	Indian Institute of Technology Madras
27	149	Physical and Numerical Model to Investigate Shallow Tunnel Instabilities in Loose Soil	Ratan Das, Kunwar Mrityunjai Sharma and T N Singh	Indian Institute of Technology Bombay
28	152	Research on the additional resistant energy effect for supporting structure to surrounding rock in underground powerhouse	Zhang Jianhai	Sichuan University
29	154	Research on damage constitutive model of coal with different depths	Li Qin, Zhaopeng Zhang, Man Wang, Ru Zhang, Mingzhong Gao, Zetian Zhang and Zheqiang Jia	Sichuan University
