

Theme 3: Unconventional oil and gas extractions

Index No.	Paper No.	Paper Title	Authors	Affiliation
1	6	Fractal characteristics and acoustic emission of a low-clay shale after CO ₂ -water-rock interactions	Qiao Lyu, Jingqiang Tan, Junping Zhou, P.G. Ranjith, Chenger Hu and Wenbin Luo	Central South University
2	10	A Multi-space Scale, Multi-time Scale, and Multi-physics Model for the Extraction of Shale Gas	Mingyao Wei	Institute of Rock and Soil Mechanics, Chinese Academy of Sciences
3	13	Research on the anisotropic crack initiation and crack damage stresses based on triaxial compression experiments and theory	Liu Yang, Lingyun Li, Yufei Jiang and Guihong Liu	Sichuan University Jinjiang College
4	23	Experimental investigation on the mechanism of fluid flow through the tensile and shear fracture surface	Jing Xie, Heping Xie, Mingzhong Gao, Ru Zhang, Zetian Zhang, Li Ren and Zhaopeng Zhang	Sichuan University
5	43	The mechanical behavior and permeability evolution of coal under different mining-induced stress conditions and gas pressures	Zetian Zhang, Heping Xie, Ru Zhang, Mingzhong Gao, Jing Xie and Zhaopeng Zhang	Sichuan University
6	75	Model of Coalbed Methane Permeability Prediction Based on BP Neural Network	Liu Sheng-Gui, Huang Jin-Kuang and Tang Song-Lei	China University of Mining and Technology (Beijing)
7	83	Lattice Boltzmann simulations of Gas Transport in Shale Kerogen with Adsorption Effect	Shenggui Liu, Zhigao Peng, Songlei Tang and Yingjun Li	China university of mining and technology (Beijing)
8	95	Laboratory characterization of nanoparticles-stabilized foam for fracturing fluid applications	Nurudeen Yekeen, Eswaran Padmanabhan and Ahmad Kamal Idris	Universiti Teknologi PETRONAS, Malaysia.
9	101	A review on the microplane constitutive model of quasi-brittle materials: theory and application	Cunbao Li	Sichuan University
10	106	Laboratory study of anisotropic permeability for tight sandstone and shale from Cooper Basin, Australia	Zhejun Pan, Deasy Heryanto, Dave Down,	CSIRO

Theme 3: Unconventional oil and gas extractions

			Luke Connell, Michael Camilleri, Yuling Tan and Regina Sander	
11	115	Fracturing behavior of shale reservoirs in water, N ₂ and SC-CO ₂ fracturing process	Jianguo Wang and Xiangxiang Zhang	China University of Mining and Technology
12	118	Anisotropic Failure Behavior and Breakdown Pressure Evaluation of Hydraulic Fracturing Experiments on Shale	Jun Wang, Heping Xie, Li Ren and Lingzhi Xie	Sichuan University
13	127	Interactions between Hydraulic and Natural Fractures Based on PFC2D Modeling	Jian Zhou	Institute of geology and geophysics, CAS
14	130	Damage driven fracture propagation in anisotropic material using XFEM	Wencheng Jin	Georgia Institute of Technology
15	138	Temperature and Pressure Dependent Gas Diffusion Coefficient in Coal: Numerical modeling and experiments	Shuyuan Liu, Chenhui Wei, Wancheng Zhu and Yongjun Yu	Northeastern University
16	141	Fracturing-fluid Migration Front Progression in Fractured Gas Shale: Experiment and Numerical Analyses	Fei Wang, Ziqing Pan, Qiaoyun Chen and Hun Lin	China University of Petroleum, Beijing
17	143	Numerical Simulation on Promoting Gas Drainage in Low Permeable Coal Seam by Heat Injection	Ruifu Yuan, Xiao Wei and Dongyin Li	Henan Polytechnic University
18	160	Fracture Evolution and Gas Transport Laws of Coal and Rock in Kilometer Deep Coal Mine with Complicated Conditions	Jianguo Zhang, Man Wang and Yingwei Wang	China Pingmei Shenma Group
19	161	Advances and Challenges of Using Grain-Based Model in Geomechanics Modeling	Ngai Wong	The University of Hong Kong
