

Theme 6: Mining engineering

Index No.	Paper No.	Paper Title	Authors	Affiliation
1	19	Experimental investigation of cemented construction waste backfill containing limestone powder and low-quality fly ash	Shenghua Yin, Xun Chen and Haoqiang Zhang	University of Science and Technology Beijing
2	26	Assessment Causes of Overbreak and Control Measures In Underground Tunnel during Construction - A Case Study from Central Himalayas (HP)	Shyo Prasad, Ratan Das, T N Singh and Rajeev Prasad	IIT BOMBAY
3	33	Effect of prefabricated crack width on stress intensity factors of Brazilian disc sample with centre crack	Cong Li, Mingzhong Gao, Yiqiang Lu, Qiang Liu, Zhiqiang He and Gaoyou Peng	Sichuan University
4	41	Water-Rock-Sand Three-Phase Mixture Flow Model and Temporal-Spatial Evolution of Granular Rocks	Dan Ma and Qiang Li	Central South University
5	53	Geological and Geotechnical Problems Encountered during Construction of Butterfly Valve Chamber and Penstock Assembly Chamber of Tehri Pumped Storage Plant	Shyo Prasad, Ratan Das, T N Singh and Rajeev Prasad	HCC Ltd
6	55	Research on Law of Front Abutment Pressure Change of Top-Coal Caving	Zhiqiang He, Mingzhong Gao, Jing Xie, Yiqiang Lu and Cong Li	Sichuan University
7	70	Analysis on the Characteristics of Overlying Mining Stress and Fracture Evolution Regularity under the Close Distance Superposed Coal Seam Group mining	Gaoyou Peng, Mingzhong Gao, Wenyong Wang, Qiang Liu, Hailiang Chen and Tong Lu	Sichuan University
8	77	3D modelling of microwave induced damage and fracturing of hard rocks	Tao Xu and Yang Yuan	Northeastern University
9	78	Bursting strain energy: A new seismic-based method for rock burst early warning in underground coal mines	Wu Cai, Linming Dou and Guangyao Si	China University of Mining and Technology
10	80	A Numerical Study of Stress Distribution and Fracture Development Above a Protective Coal Seam in Longwall Mining	Chunlei Zhang	China University of Mining and Technology, Beijing

Theme 6: Mining engineering

11	85	Experimental study on crushing dissipated energy of deep granite under triaxial geostress condition	Lu Chen, Lan Qiao, Ming Zhou and Qingwen Li	University of Science and Technology Beijing
12	94	Sensitivity Curve of Anthracite in Qinshui Basin	Liu Shenggui, Tang Songlei, Peng Zhigao and Lv Mindong	China University of Mining and Technology (Beijing)
13	102	The immediate roof periodic fractures of suberect and extremely thick coal	Zhang Guojun and Zhang Yong	China University of Mining and Technology (Beijing)
14	103	Effect of faults on stability of partially saturated rock slope	Greg You, Navdeep Jaggi, Maged Al Mandalawi, Kim Dowling and Peter Dahlhaus	Federation University Australia
15	122	The Effect of Water on Mechanical Properties of a Typical Coal	Ting Ai, Ru Zhang, Zhaopeng Zhang, Zheqiang Jia, Li Ren and Zetian Zhang	Sichuan University
16	132	Stability Analysis of Shallow Depth Tunnel in Weak Rock Mass: 3D Numerical Modeling Approach	Mohammed Sazid, Hussin A. M. Ahmed, Bankim Mahanta and T N Singh	King Abdulaziz University
17	134	Investigation of compressive mechanical properties of coal using dual stereo-digital image correlation system	Xinxing Shao, Wenyong Wang, Zhenning Chen, Mingzhong Gao and Xiaoyuan He	Southeast Univerisity
18	140	Coal-gangue recognition method based on neural network in the intelligent top coal caving mining	Ningbo Zhang and Changyou Liu	China University of Mining and Technology
19	159	Study on the failure process of rock masses using the discontinuous deformation and displacement (DDD) method	Bin Gong, Shanyong Wang and Chun'An Tang	The university of newcastle
