

Theme 8: Geo-environmental engineering

Index No.	Paper No.	Paper Title	Authors	Affiliation
1	17	Calculation methods of seepage coefficient for clay based on the permeation mechanism	Yu Zhang and Tielin Chen	Beijing Jiaotong University
2	32	Experimental study of compression and shear deformation characteristics of Gaomiaozi bentonite under high confining pressure	Haoran Guo, Lan Qiao and Yuan Li	University of Science and Technology Beijing
3	48	Study on distribution law of ground stress field with the example of Xuefeng mountain	Chuan Xu	Sichuan University
4	51	The application of a geographically weighted logistic regression model for earthquake-triggered landslide susceptibility mapping on different geographic scales	Qigen Lin and Ying Wang	Beijing Normal University
5	54	Research on the Dynamic Propagation Law of Cracks in Sandstone Specimens Under Impact Load	Yiqiang Lu, Mingzhong Gao, Sheng Zhang, Jing Xie, Qiang Liu, Zhiqiang He and Cong Li	Sichuan University
6	73	Study on the law of ground pressure obliquity effect with gently inclined thin to medium thickness phosphate body from open-pit to underground	Xiao-Shuang Li, Kui Zhao, Qi-Chao Liang and Xue-Yi Zhi	Jiangxi University of Science and Technology
7	74	Hydraulic conductivity of tailings under different chemical conditions	Yajian Shao	University of Science and Technology Beijing
8	100	Experimental Study on Strength Weakening Effect of Weak Structural Planes in High Arch Dam Abutment under Multi-field Coupling	Baoquan Yang, Lin Zhang, Yuan Chen, Jianhua Dong and Jianye Chen	Sichuan University
9	131	Extension strain initiation and distribution around open pit slope	Maged Al Mandalawi, Mohannad Sabry, Peter Dahlhaus and Kim Dowling	Federation University Australia
10	144	Desiccation cracking in bentonite thin clay layers	Noor Mohammad, Yixiang Gan and Abbas El-Zein	The University of Sydney
11	145	Imbibition-induced effective stress evolution in heterogeneous porous media	Si Suo and Yixiang Gan	The University of Sydney

Theme 8: Geo-environmental engineering

12	148	Hydraulic conductivity of tailings under different chemical conditions	Yajian Shao	University of Science and Technology Beijing
13	150	An evaluation of interface shear strength for different soil-geosynthetics through direct shear test	Zhanbo Cheng and Xueyu Geng	University of Warwick, Coventry
